

PRODUCT PORTFOLIO

Glass, shaped around your project.

Architectural and decorative glass processing.
A practical introduction for international buyers.

PRODUCT FAMILIES / SPECIFICATION GUIDE / ENQUIRIES

Architectural application illustration. Glass selection depends on the project specification.

ENGLISH EDITION

SEPTEMBER 2026

01 / PRODUCT RANGE

Six product families. One clear starting point.

Choose a product family, then share the application and required specification so the project can be reviewed.

01 Tempered Glass

Heat-treated glass for project-specific glazing requirements.

Specify: dimensions, edge details and cut-outs.

02 Laminated Glass

Layered glass assemblies with an interlayer selected for the application.

Specify: glass build-up and interlayer requirements.

03 Insulated & Low-E Glass

Glazing units and coated-glass options for building envelopes.

Specify: unit build-up and target performance.

04 Curtain Wall Glass

Glass specifications coordinated with the facade design.

Specify: panel schedule, system details and appearance.

05 Decorative Glass

Glass finishes and visual treatments for interior concepts.

Specify: design reference, finish and installation context.

06 Security Glazing

Project enquiries requiring a defined security specification.

Specify: applicable standard and required test evidence.

Final availability and suitability depend on the agreed glass construction, dimensions, application and required documentation.

02 / ARCHITECTURAL GLASS

From design intent to a clear specification.

Well-defined drawings and performance requirements make a quotation more useful and reduce revisions.

Architectural application illustration.

01 Tempered glass

Share a dimensioned drawing showing finished size, edge treatment, holes, cut-outs and any shape requirements. Confirm all fabrication details before production.

02 Laminated glass

Identify the intended use and proposed glass / interlayer build-up. Specify appearance, edge exposure and any performance or documentation requirements.

03 Insulated & Low-E glass

Provide the glass build-up, cavity requirements, coating preference and required thermal, solar, acoustic or visual criteria for review.

04 Curtain wall glass

Provide panel schedules, facade-system details, coating and colour expectations. Agree the applicable specifications and acceptance criteria with the project team.

03 / DESIGN-LED & SPECIALIST ENQUIRIES

Appearance matters. So does the specification.

Capture the intended visual result and the evidence required for the application before selecting a glass construction.

Decorative application illustration. Discuss the design and finish required for your project.

DECORATIVE GLASS

Translate the concept into a reviewable brief.

Share the design, colour, texture and privacy expectations, together with panel dimensions and the installation context.

Where appearance is critical, discuss a sample or reference for approval before an order is finalised.

SECURITY GLAZING

Start with the required standard.

State the intended application, required classification and relevant test standard. Request documentation for the exact proposed glass build-up.

For security applications, define the required performance and request product-specific evidence before approving the glass construction.

04 / YOUR ENQUIRY

A better brief. A more useful quotation.

Send the information you have. Clearly mark any item that still requires technical discussion.

PROJECT

Application, destination country and project context.

PRODUCT

Product family and the proposed glass construction.

DRAWINGS

Finished sizes, quantities, shapes, holes and cut-outs.

APPEARANCE

Colour, coating, texture and visual reference.

REQUIREMENTS

Target performance, applicable standards and required documents.

DELIVERY

Delivery destination, requested timing and packing considerations.

BEFORE AN ORDER IS CONFIRMED

Agree the final specification, quantity, price, documentation, packaging and commercial terms in writing.
Availability and delivery timing are confirmed for each enquiry.

Your next project starts with a clear enquiry.
